ABOUT US

Who We Are? Our Mission & Vision

Affinity Textiles is a Exporter of Home Textile including Bed, Bath, Kitchen and Living textile Items since 2000, based in Karachi – Pakistan.

Mission Statement:

At Affinity Textiles, we go beyond providing home textiles — we create personalized experiences. By blending advanced manufacturing techniques, eco-conscious practices, and a deep understanding of our clients' industries, we deliver products that redefine quality, performance, and style. Our mission is to empower businesses with tailor-made solutions, ensuring every partnership reflects our commitment to excellence and creativity.

Vision Statement:

To revolutionize the home textile industry by combining bespoke customization, sustainable innovation, and unmatched customer collaboration to create value-driven solutions tailored for businesses worldwide."

Our Trusted and valuable customers with us from the day first to till now.

Europe

United States

Canada

OUR PROCESS

WARPING/SIZING

Warping/Sizing is an initial process to prepare the yarn. The method of applying a protective coating upon the surface of the yarn is termed warping. At our warp operation, we carefully combined the yarns from several cones and made a protective covering.

WEAVING

Weaving is the technique of creating a cloth by interlacing vertical and horizontal threads called warp and weft at accurate angles. Weaving is the most pivotal method of fabric manufacturing; we meticulously interlace warp and weft to make a fabric.

DYEING

Dyeing is a process of uniform coloration of textile materials using dyes or pigments in an aqueous medium. We pay close attention to each stage of manufacturing and ensure high-quality dyeing. Reactive/Indanthrene dyes are utilized in the dyeing process as per the customer's demand.

OUR PROCESS

CUTTING & STITCHING

To ensure proper cutting, we complete the design first, then cut the fabric according to the shape and submit it to the stitching. Stitching is the process whereby fabric is fashioned into a finished product by means of different sewing techniques.

CHECKING & PACKAGING

We have a separate packing department to examine the products before packing them. We packed products in seaworthy export boxes according to the buyer's specifications, such as assorted or separated. Then after a thorough analysis, we get the product ready to ship.
